DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1,3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 lines 8-9, "a strip footing" is recited; at line 1 "a strip foundation" is recited; it is unclear if they are related.

Claim 3, the body of the claim and the preamble do not commensurate. The preamble is directed to a "holding/leveling device"; however the body includes the "u-shaped socket". It appears that the preamble such be directed to a --A foundation system comprising a holding/leveling device and U-shaped socket groove strip--

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over British document (GB 2254099) in view of Japanese documents (JP 10219706) and Japanese document (JP2003247242.

Application/Control Number: 10/588,819

Art Unit: 3672

British document teaches a pre-cast socket comprising a part of a strip foundation having a longitudinal socket groove, said socket groove being U-shaped having a bottom wall and two sidewalls projecting upwardly from said bottom wall (see Fig. 1). British document discloses the invention substantially as claimed. However, British document is silent about include inner and outer holes and planar mesh extending from a bottom wall. Japanese document '706 teaches inner and outer holes (see Fig. 2). Japanese document '242 teaches a planar mesh extending from a bottom wall (see Fig. 1). It would have been considered obvious to one of ordinary skill in the art to modify British document to include the inner and outer holes as taught by Japanese document '706 and to include the planar mesh as taught by Japanese document '242 since such a modification facilitates the installing and anchoring of the foundation.
